

AliGLOSS

by ForestOne

AliGLOSS is ForestOne's Aluminium Composite Panel (ACP). AliGLOSS is a 3mm thick panel with a polyethylene core sandwiched between two 0.2mm aluminium sheets, meaning the panels are extremely robust and offer a rigid and strong product. AliGLOSS is commonly used as a substrate for signwriting and features a high gloss PVDF coating that can be screen printed upon. The PVDF coating is suitable for exterior applications and is widely used in commercial construction for building cladding and for internal wall linings; especially in moisture sensitive areas. The versatility of AliGLOSS means that it is also ideal for use as a white or black marker board in office fitouts, meeting rooms or cafes. AliGLOSS is also suitable for office and shop fitouts or other commercial applications and comes with a 5 year warranty.

AliGLOSS COLOURS:

KEY FEATURES:

- Light weight
- High gloss finish
- Can be screen printed
- Cost effective
- Strong and durable
- Impact resistant
- Water resistant
- Non toxic and resistant to chemicals
- 5 year warranty

SHEET SIZE:

White/Black

1220 x 810 x 3 mm, 2440 x 1220 x 3 mm

Brushed Aluminium

2440 x 1220 x 3 mm

INSTALLATION:

AliGLOSS can be cut, drilled and worked with normal woodworking tools. Stainless steel fixings are recommended. The sheets can be fixed to flat surfaces using a flexible adhesive (Sikaflex is recommended) and double sided tape to hold sheets in place while the adhesive sets.

APPLICATIONS:

- Commercial construction
- Building cladding
- Internal wall linings in moisture sensitive areas
- Marker board
- Meeting room walls
- Screens and workstation panels
- Signwriting
- Splashback
- Office fitouts
- Shop fitouts
