FOR DESIGNERS

Specifying Responsibly

With ForestOne

ForestOne and MEGANITE

Create contemporary interiors without limitations. MEGANITE is a 100% Crystalline Silica Free premium Solid Surface. Replicating the appearance of stone, marble or concrete, MEGANITE removes the risks associated with engineered stone, delivering elevated aesthetics with superior functionality.

What is Solid Surface?

Introduced in the 1960s, Solid Surface is a non-porous material made from an acrylic blend that resembles the look of stone. Solid Surface production involves chemically curing a mixture of acrylic, resin, fillers, colour pigments and acrylic pellets, which are then cut into sheets. Solid Surface is workable like hardwood, but can also be heated and thermoformed to curve and mould into desirable shapes.

Solid Surface vs. natural and reconstituted stone

Stone has become a popular material for kitchen surfaces due to its luxurious look and feel. However, stone is not without its downsides; it's important to recognise the inherent dangers associated with exposure to silica-dust and the risk faced by craftspeople when working with stone. ForestOne recommends MEGANITE brand Acrylic Solid Surface for a safe, cost effective alternative to stone, with unlimited design potential and none of the risk to fabricators.

MEGANITE Basins and ANTEGRA Sinks

To compliment Solid Surface interiors, MEGANITE has designed a series of beautifully crafted basins. Available in different sizes, the basins offer designers an effortless means of crafting around set spatial plans, enhancing the design of rooms both large and small. All MEGANITE basins are available in a crisp Snow White décor.

ANTEGRA brand undermount sinks are also available to enhance design, and combine perfectly with surrounding MEGANITE décor for a seamless, sophisticated look. Choose from a range of Stainless Steel, Copper, Gun Metal and Gold Brass. ANTEGRA sinks are supported by a 75-year manufacturer's warranty.

MEGANITE Acrylic Solid Surface

CRYSTALLINE SILICA FREE, FOOD-SAFE AND 100% NON-POROUS ALTERNATIVE TO STONE

A responsible and affordable alternative to engineered stone that replicates the look and feel of real stone. A premium Solid Surface that is 100% Crystalline Silica Free.

Design advantages

- ✓ Made from non-porous materials that mimics the appearance of natural stone (Movement series)
- ✓ Wide range of colours, textures and patterns to enhance design aesthetics
- ✓ Thermoformable (heated to curve and mould into shapes) offering greater design flexibility and freedom
- ✓ Horizontal and vertical applications
- ✓ Group 1 Fire rated for wall lining applications

Product applications

- ✓ Kitchen
- ✓ Sinks / basins
- ✓ Bathtubs
- ✓ Benchtops
- ✓ Splashbacks
- ✓ Wall claddings
- ✓ Showers
- ✓ Healthcare (Acrymed range)
- ✓ Education

Sustainability and lifestyle benefits

-  100% Crystalline Silica Free — peace of mind when processing Acrylic Solid Surface
-  NSF-51 Certified Food Safe
-  Advanced anti-microbial in Acrymed range integrated throughout the entire sheet (ISO 22196 / JIS Z 2801 certified)
-  GreenGuard and GreenGuard Gold Certifications for Indoor Air Quality
-  Easy to repair if damaged
-  Stain resistant
