With ForestOne

ForestOne and MEGANITE

Create contemporary interiors without limitations. MEGANITE is a 100% Crystalline Silica Free premium Solid Surface. Replicating the appearance of stone, marble or concrete, MEGANITE removes the risks associated with engineered stone, delivering elevated aesthetics with superior functionality.

What is Solid Surface?

Introduced in the 1960s, Solid Surface is a non-porous material made from an acrylic blend that resembles the look of stone. Solid Surface production involves chemically curing a mixture of acrylic, resin, fillers, colour pigments and acrylic pellets, which are then cut into sheets. Solid Surface is workable like hardwood, but can also be heated and thermoformed to curve and mould into desirable shapes.

Solid Surface vs. natural and reconstituted stone

Stone has become a popular material for kitchen surfaces due to its luxurious look and feel. However, stone is not without its downsides; it's important to recognise the inherent dangers associated with exposure to silica-dust and the risk faced by craftspeople when working with stone. ForestOne recommends MEGANITE brand Acrylic Solid Surface for a safe, cost effective alternative to stone, with unlimited design potential and none of the risk to fabricators.

MEGANITE Basins and ANTEGRA Sinks

To compliment Solid Surface interiors, MEGANITE has designed a series of beautifully crafted basins. Available in different sizes, the basins offer designers an effortless means of crafting around set spatial plans, enhancing the design of rooms both large and small. All MEGANITE basins are available in a crisp Snow White décor.

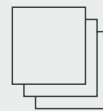

ANTEGRA brand undermount sinks are also available to enhance design, and combine perfectly with surrounding MEGANITE décor for a seamless, sophisticated look. Choose from a range of Stainless Steel, Copper, Gun Metal and Gold Brass. ANTEGRA sinks are supported by a 75-year manufacturer's warranty.

MEGANITE Acrylic Solid Surface

SAFELY CUT AND FABRICATE ON-SITE
WITHOUT RISK OF EXPOSURE TO SILICA DUST

RANGE AND SUPPLY OPTIONS

Available in 49
stylish décors

High speed
delivery nationwide

Commercial benefits

- ✓ Cost effective alternative to natural stone and other Solid Surface leading brands
- ✓ No sealing required
- ✓ Group 1 Fire rated for commercial applications (wall linings)

Fabrication advantages

-  Easy to repair and refresh
-  Innovative installations — Solid Surface sinks can be joined with no gaps
-  No risk to silica exposure when cutting sheets

Sheet size advantages

3660 x 760 x 12mm — All colours

Additional sizes available for:

MEGANITE AcryMed

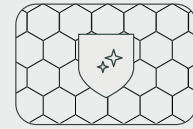

AN ADVANCED PROTECTIVE ANTI-MICROBIAL SURFACE SOLUTION

HOW IT WORKS

Untreated

AcryMed

AcryMed employs a physical method known as ionic exchange to disrupt the cell wall of microbes. This approach is fundamentally different from chemical processes.

Commercial benefits

- ✓ An innovative anti-microbial Acrylic Solid Surface material tailored for use in medical environments
- ✓ AcryMed incorporates anti-microbial protection directly into the Solid Surface sheet during manufacturing, safeguarding the product from stain and odour-causing bacteria
- ✓ Crystalline silica-free
- ✓ The non-porous nature eliminates germ growth

Fabrication advantages

- ✍ Easy to repair and refresh
- ⊗ No risk to silica exposure when cutting sheets
- ⊗ Low VOC

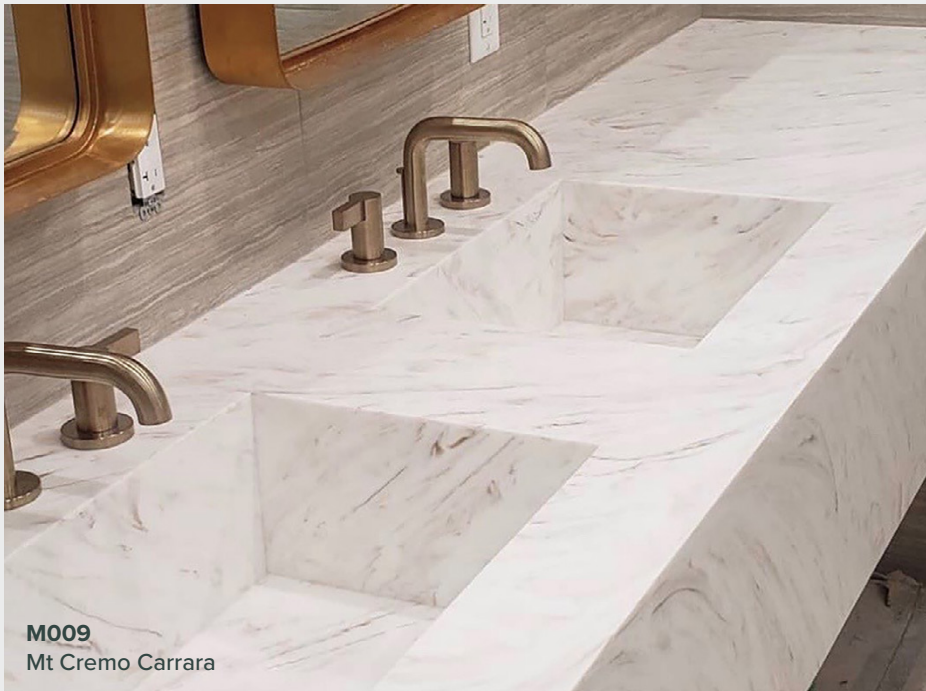

Sheet size advantages

3660 x 760 x 12mm
